♀ Nairobi, Kenya

I am a hardworking and motivated Senior Data Analyst, currently based in Nairobi, Kenya. I have a breadth of data analysis experience, having worked on different development projects, both in Kenya and beyond. I have extensively worked with R for 7 years, and with Python for 3 years. I am also an active member of amazing data science communities in Nairobi, i.e PyData Nairobi, Nairobi Women in Machine Leaning ,AI Kenya, NairobiR and AfricaR. I enjoy learning new things each day, and I am always ready to take up new challenges as they arise.

▤ Competencies

Statistics software :	R, STATA, SPSS
Programming :	Python, SQL
Databases :	MySQL, PostgreSQL
Development editors :	RStudio, Sublime
Data visualization/Reporting :	R Markdown, Jupyter notebook, R Shiny
Operating systems :	Mac OS, Windows, Linux
Survey Programming :	ODK

💼 Professional Experience

January 2020
October 2019

Research Manager, Geopoll, Nairobi, Kenya

> Enhance data collection services including survey design, sample management, survey implementation, case study development and reporting.
> Coordinate on projects with diverse partners and clients for survey design and research.
> Provide consultation and guidance to the research team and other teams on statistical methodologies and analysis.
> Engage in day to day research tasks such as open ended coding, data preparation and quality control and implementing improvements for faster data preparation for custom research and media audience data.
> Develop a research strategy for leveraging the Geopoll platform to improve both understanding of population behavior, needs, and vulnerabilities as well as capacity to monitor and evaluate the impact of clients projects, policies and programs.
> Perform case studies with existing data sets and mobile surveys to explore a new methodology of research and modular analysis.
> Assist in strategically thinking about mobile surveys, uses of data and information design.
> Implement any software required for accessing and handling data appropriately.
> Engage with technical and development teams for best approaches on different data collection outputs.
> Visualise and report data findings creatively in a variety of formats and creation of dashboards used for output/display of data
> Further development of team capabilities
> Manage day to day teams to meet timelines for clients deliverables,for customs research and audience measurement.

R | SPSS | PowerBI

August 2019 May 2017	**Data Analyst, Busara Center for Behavioural Economics, Nairobi, Kenya** > Data validation and processing > Analysis of data from field, lab studies and transactional data from institutions > Designing data collection tools using Survey CTO > Cleaning data and conducting high frequency checks > Generating visualisations (using R's ggplot2 and R Shiny) > Preparing data tasks for interviewees > Training R to research analysts and associates > Attending client meetings, to explain statistical concepts to them > Assist in preparation of pre-analysis plans by selecting appropriate statistical methods > Development of interactive dashboards > Collaborate with the programming team to develop internal systems > Application of machine learning algorithms to build predictive models > Assist in designing reviewing research tools and writing proposals R Shiny Python MySQL PostgreSQL
2017 2015	**Assistant Lecturer, JKUAT, Karatina University, Kimathi University** > Teaching statistics and actuarial science units. > Teaching statistical programming in R > Setting and marking exams > Invigilating exams R
